

SMART AND SLEEK

Smooth Synergy is more than just your basic medispa.

In the quest for head-to-toe perfection, Smooth Synergy, a Midtown medispa, has a wealth of gizmos that zap and polish. Owner Nicole Contos is one of the few to have the latest generation of endermologie machines, which not only battle cellulite, but are designed to boost collagen and reduce fat.

Smooth Synergy also offers laser hair removal, an organic spray tan that doesn't turn clients orange (Miley Cyrus is a fan), micro-current lifting facials and a "fanny facial" that exfoliates and tones the butt.

One factor setting this place apart is that Contos's husband, Dr. George Liakeas, is on premises as the medical director. "A lot of places call themselves medispas, but the doctor is rarely there. My husband is always here," she says. Dr. Liakeas, an internist, is expert in injectables such as Botox and Radiesse, the popular filler used for contouring.

The husband-and-wife partnership is at the root of the name Smooth Synergy. "We really care about our clients," says Contos. "If someone comes in for a facial and has a cold, my husband is on hand to offer a Claritin." *686 Lexington Ave., 212-397-0111; smoothsynergy.com—B.L.*
