

Smooth Operator

Wednesday, November 15, 2006 by Katherine Romero

Not as smooth as you thought you were? Get some help with **Smooth Synergy's** three new services.

For those who have always wanted to try the rejuvenation affects of mesotherapy but were too afraid of the dozens of injections, **Non-needle Mesotherapy** is for you. The treatment is only offered at New York City's Cosmedical Spa and is done thru a machine which uses electric currents and ionic technology to deliver therapeutic ingredients directly to the body. Non-needle Mesotherapy is the only safe machine approved by the FDA and will leave you with long lasting results.

Smooth Synergy's Organic Spray Tan is for those who like to fake and bake and want a long lasting natural tan. The spray uses a combination of mineral salt bronzers and the approved cosmetic tanning agent DHA 20 to produce a natural looking tan. **Smooth Synergy's** UV-less tanning product contains no alcohol, oils, perfumes, or potentially harmful chemicals. While the treatment lasts up to 30 minutes, results last up to five to seven days depending on your skin.

And last but not least is the deliciously refreshing **Blueberry Swirl Two-Step Peel** which uses active blueberry extracts to exfoliate the skin giving you a youthful glow without any irritation. This refreshing facial peel uses Lactic Acid and blueberry antioxidants to purify the skin. Then, the hydrating benefits of D-Glucuronic Acid finish off this wonderfully gentle yet effective peel. Following the Blueberry scrub, the Benefit Peel is applied which gives you a boost of collagen. This treatment is designed for those who have sensitive skin and lasts up to 45 minutes.
